Counter Cache Intelligent

One Touch Cash Handling Solution

Once cash has been handed over from the customer to the retailer, 100% of this money should find its way quickly and directly into the retailers bank account. The CCI can achieve this on two levels. Firstly it will eradicate any unaccountable cash shrinkage, making it an invaluable tool for any loss prevention department. Secondly it will deliver significant operational time/cost saving of around 75% - 85% with an average ROI of under 2 years

Optimum Environment
High volumes of cash but low transaction value ie: 2 - 3 notes

Cash Process
Notes are accepted by the unit at the POS, they are no longer touched, counted or accessible until they are removed from the CCI

Cash Visibility
As notes are deposited they are counted, verified and time stamped, this data can link into EPOS or integrated into back office software

Benefits Through the Cash Flow Process

Next Generation
Intelligent Cash Handling

75-85%
Admin Reduction

Versafe Intelligent Cash System

The Versafe puts an end to the time-intensive, manual process of traditional cash management. The safe will reduce internal shrinkage and the amount of times the cash is touched and reduce the overall cost of processing cash. All transactions and cash deposits are time stamped and recorded this data can be viewed on software accessible from PC/laptop or even on a smartphone

At the end of a days trading, Financial institution or CIT can receive day close data, the financial institution or CIT can provide credit on validated cash giving the retailer faster access to the moneys credit while it is still physically still inside the Versafe

Accountability

The Versafe will report all data by date, time, user and specific activity giving a complete audit trail and visibility of revenue across the estate

Monitoring

Versafe is updated in real time as deposits are made at each Versafe, information can be viewed by denomination split, total and % value of each cassette or sealable pouch

Versafe
Versalink

Direct link from Versafe to cloud based software

RCS 800 Retail Cash Office System

RCS 800 is an innovative cash processing solution developed in cooperation with leading international retailers and CIT operators. By streamlining cash administration and verification procedures, the system enables faster, more efficient cashier routines for collecting cash floats and depositing the days takings. Manual packaging of cash is eliminated. The CIT operator can keep a close check on cash flow data and reduce coin loads and optimise collection cycles in order to minimise environmental impact from cash transport.

Optimum Environment

High volumes of cash but low transaction value ie: 2 - 3 notes

Cash Process

Notes are accepted by the unit at the POS, they are no longer touched, counted or accessible until they are removed from the CIT

Cash Visibility

As notes are deposited they are counted, verified and time stamped, this data can link into EPOS or integrated into back office software

The float is automatically populated in the till drawer...
Per individual cashier

Maximum cash flow control
Recycling of coins and notes increasing efficiency and staff flexibility

CDS 707 Bulk Note Deposit Machine

The CDS707 high-speed bulk note deposit machine will help operators process the increasing volume of bank notes. With a very compact footprint it processes notes at a rate of 8 a second including validation and uses advanced note recognition technology for highly accurate counting and to identify counterfeit currency. The CDS707 is a cost effective option for many operators and it has the ability to securely store upto 5,000 bank notes in its CEN rated safe.

Optimum Environment
Stores operating 10 + till points

Cash Process
Carried out by either input from the touch screen, or via dallas key units are supplied with the machine for CIT, supervisor or operator usage

Cash Visibility

Receipts for all transactions are produced by the internal thermal printer. A TCP-IP network connection is available for remote control or monitoring of the machines

- Operational Benefits...
- No Manual Cash Handling
- No Cash Count
- Automated Reconciliation
- No Banking Count/Reperation
- Loss Prevention...
- No Cash Shrink
- Cash Stored in Safe rated Unit
- Cashier does not touch any Cash

CashComplete Automated Cash Handling
 Completely Closed Loop Cash Handling

The system provides a complete closed loop solution to cash processing, from the point at which cash is presented at the point of sale through to the back office reconciliation. CashComplete® secures cash and keeps it unexposed throughout its journey through the cash cycle. The system ensures that all cash taken is valid, and that each transactions cash in and change out is accurate to the EPOS transaction total. All cash is secured with no access from shop staff, thereby improving staff security against attack and robbery.

Combined with the CashComplete Transport Unit, cash can easily and discreetly be removed from the till point at end of day, or as appropriate, to either back office or to cash centre. The Transport unit can be used locally by shop staff if reort unit can be used locally by shop staff if required, to transport the cash from the point of sale to a back office safe for CIT collection later, again without exposure of cash at any point. With CashComplete shrinkage and till inaccuracies disappear, cash is better managed and staff time is significantly reduced, quired, to transp

GBP & Euro Coin Sorter

Stirling and Euro coin sorter and batching capability

A low cost automatic coin sorter and counting machine for lower volumes of UK Sterling coin. (Also available for Euro coins) Mains operated with a LED display showing the total value counted and values for each denomination counted

- Counting speed: 216 coins per minute
- Pre-set denomination batching
- Desktop sorter
- Dimensions: 355(D)mm - 330(W)mm - 266(H)mm
- Net weight: 3.5KG

Coin Sorter Mach 6

With optional WAVE coin authentication

The Mach 6 is a fast, compact coin sorter/counter configurable for tabletop or higher volume applications requiring bagging capability. Mach 6 is the perfect solution for medium size bank branches, retailers, transportation authorities and even casino operations. Highly configurable, Mach 6 can track and consolidate management information, eliminating the need for manual reporting

- Up to 3000 coins per minute
- Pre-set batching
- Management information control
- Counterfeit coin option
- Selectable bag stops
- 2 line alpha-numeric display

Coin Sorter Mach 3

Coin sorter/counter/packager

The Mach 3 is a versatile, cost efficient compact coin sorter that simplifies and speeds coin processing for any business that counts, sorts or packages coin by hand

- Up to 1500 coins per minute
- Pre-set batching
- Bagging function
- Continuous sorting
- PC connectivity
- Heavy duty chassis design
- Coin path access

Coin Sorter Mach 9 and 12

The Mach 9 is a high speed coin sorter applicable to high volume processing centres where throughput and reliability is paramount. Mach 9 is the perfect solution for financial processing centres, vending and transport companies and gaming houses. Highly configurable, Mach 9 can track and consolidate management information eliminating the need for manual reporting. Optional coin authentication provides another layer of security and precise count assurance

- Up to 4,500 coins per minute
- Pre-set batching
- Management information control
- Counterfeit coin option
- 10,000 coin feed
- Trouble free operation

WAVE Detection

Coin authentication technology

With the addition of patented WAVE coin authentication option, the Mach 9 becomes the ideal machine to assist in the rejection of intrusive or counterfeit coins. Coin detection increases accountability while maintaining the highest degree of accuracy

Efficient

The standard management information control system (MICS) provides three levels of memory and allows other media - such as cheques, vouchers or bulk coin to be entered via keypad. Notes can be entered manually or automatically transferred if note counter is interfaced, ensuring a comprehensive audit trail

Ease of Use

An easy to read LCD graphic display provides clear function status and operational messages. Selectable bag stops, batch, sub, grand totals are easily accessed via the direct keypad. Full enable easy and quick data entry. Patented quick release bag attachments make it easier and faster for operators to remove and replace bags as they fill

Unmatched Throughput

Throughput is the truest measure of productivity and can only be achieved when a coin counter runs uninterrupted. The Mach 9's patented sorting system ensures trouble free operation and unrivalled performance

Thoughtful Design

The Mach 9 was designed specifically for high volume applications. Its ergonomic design is both functional and aesthetically pleasing. Keypad and printer are easy to reach yet out of the way of heavy coin bags. There's a place to store pens, pencils, and clips and even a dedicated space to rest coin bags

2 way Communications

2 Way radios for improved communications across

Digital Two Way Radios are changing the face of the radio communications industry as consumers and businesses demand higher quality wireless communication. And the digital 2 way radios available from Cashtec bring you the very latest in digital communication at extremely affordable prices.

If you want the best digital two way radio for your business, event or location then we have the Radio Systems for you – Bringing you the next generation of two way radio from the World's Leading 2 Way Radio manufacturers including:

You no longer have to settle for second best when it comes to wireless communication as our range of digital radios mean that whatever your requirements or budget, we now have a digital solution to meet your needs.

To view our extensive range of digital two way radios currently available simply refer to the next page which is constantly being updated with the very latest digital 2 way radio technology.

Accessories
We have a complete range of radio accessories for all our brands of radios

for any **Environment** ...

Top Name Brands

Motorola DP3400

The Motorola DP3400 is the next-generation of professional two-way radio communication and comes with more performance, productivity and value. Thanks to digital technology that delivers increased capacity and spectrum efficiency, integrated data communications and enhanced voice communications.

The Motorola DP3400 provides clearer voice communications over a greater range than comparable analogue radios with digital error correction and static and noise rejection.

Capacity Plus

A scalable, single-site trunking solution that enables over a thousand radio users to share business-critical voice and data communication on the same system.

Emergency signaling

Sends a help signal to predefined person or group.

Rugged design

Tightly sealed against wind and dust, and submersible in up to one meter of water for 30 minutes.

Programmable side buttons

Enable access to favorite features such as one-touch calling and quick text messaging.

Bright sensors

Tricolor LED indicator shows feedback of calling, scanning or monitoring features.

Emergency button

Alerts supervisor or dispatcher during an emergency situation.

Motorola DP3601

The Motorola DP3601 portable digital two way radio are the perfect communication method for keeping business personnel in contact. Conforming to ETSI DMIR standards, these MOTORBO range digital radios from Motorola feature a keypad, display and simple menu-driven user interface.

The Motorola DP 3601 gives crystal clear, professional communications a licensed band and comes with NiMH 1300 mAh battery, impress single-unit charger, antenna, 2.5" belt clip and user guide

Built-in Global Positioning System (GPS) unit

32 channels

IP57 weather-sealing provides protection for the radio from difficult environmental conditions

Robust, textured Talk key ensures ease-of-use

Three user-definable buttons to allow operator to tailor the radio to their own needs

Well-designed scanning formats help ensure that calls always reach the user

Intuitive calling functions including group, individual and all

Emergency button and emergency call function to aid personnel safely

Powerful remote monitoring features help guarantee personnel welfare and enable swift evaluation of operator's status

PTT ID function helping to provide improved radio efficiency

Motorola DP3400

The Motorola DP3400 is the next-generation of professional two-way radio communication and comes with more performance, productivity and value. Thanks to digital technology that delivers increased capacity and spectrum efficiency, integrated data communications and enhanced voice communications.

The Motorola DP3400 provides clearer voice communications over a greater range than comparable analogue radios with digital error correction and static and noise rejection.

Emergency signaling

Sends a help signal to predefined person or group.

Talkaround function

Offers option of speaking through a dispatcher or from unit to unit.

Contacts list

holds up to 256 contacts.

Menu-driven interface

uses icons or text, easing message reading and menu navigation.

Tricolor LED indicator

shows feedback of calling, scanning or monitoring features.

Motorola MOTOTRBO SL4000

The new Motorola MOTOTRBO SL4000 Series is where function and style meet. With its thin, light and stylish design, the SL4000 from Motorola is the ultimate in discreet communications.

Combining versatility and power, the MOTOTRBO SL4000 Series portable radio is designed to meet the communication needs of customers in the hospitality, services, security and airport industries. With exceptional audio clarity, the SL Series quality of digital can't be surpassed along with unique features to help your employees hear and speak clearly, wherever they work. The radio's background noise suppression filters out external clamour - from crowded exhibitions to busy airports.

The Motorola MOTOTRBO SL4000 is designed for discretion and professionalism and really is the choice of

Sleek design

A slim and desirable shape means whoever uses the Motorola SL4000 series is guaranteed to look professional at all times. And at less than half the weight of a standard radio, the Motorola SL4000 is easy to carry, comfortable to wear and elegant in styling.

Product Features

Cover operation

For the ultimate in discretion, when the radio is put in cover mode it goes dark shielding the display, LED lights and audible tones. Your personnel can also hear clearly using the inconspicuous audioaccessories but no one else can. For further discretion, a vibrate alert feature is also included so third parties are never disturbed or interrupted.

Intuitive features

The high resolution, full colour screen on the SL Series portable automatically senses ambient light and adjusts backlighting for optimal viewing in all kinds of conditions. It also features a full keypad and an enhanced programmable button that manages up to nine frequently used features. Press a button and access all of your contacts or check the status of a work ticket with just a touch.

Expanded capacity & coverage

The far-reaching performance of the MOTOTRBO SL4000 is perfect for staff throughout your buildings and across your site.

The IP Site Connect solution dramatically improves customer service and productivity by using the Internet to extend coverage to create a wide area network, enhance single site coverage or link geographically dispersed locations. Capacity Plus provides singlensite trunking, expanding capacity to over 1,000 users.

Combining the benefits of both solutions, Linked Capacity Plus is an entry-level, multi-site trunking solution that expands capacity and extends coverage so large work teams can stay connected across a wide area. So whether you want expanded coverage at a single site or across multiple ones, the Motorola SL4000 can be scaled to meet your voice and data communication needs.

Highly reliable

The Motorola SL4000 meets the most demanding specs, including IP54 for dust and water protection and U.S. Military Standard 810 C, D, E, F and G. For further peace of mind, it's even backed by a two-year manufacturer's warranty as standard.

Kenwood NX200

The Kenwood NX200 VHF digital 2 way radio is part of the NEXEDGE range of products. All NEXEDGE products use advanced DSP-driven digital voice technologies and support both FM analogue and new digital fleets.
